To Whom It May Concern

With well earned respect, I confidently recommend SoCal Infrared and Peter Hopkins for Thermography Projects as your facility may find necessary.

Along with my team members, I had the good fortune of working with Peter at our campus on the thermographic review of our main switchgear. We have quite an extensive system comprising of over 50 buildings some aging over 60 years. Our campus takes a strong approach towards maintenance as our students depend on it and the results of thermographic survey where amazingly helpful to achieve that. Peter was able to communicate several potentially hazardous faults that were quickly addressed by our Electrical team thus reducing any potential down time. Peter and our electrical support team supported each other seamlessly, worked diligently, and communicated well together to successfully complete the project under budget and timely.

The success of any complex project depends in large measure on the team assembled and the team's ability to communicate and work collaboratively and unselfishly towards the goal. SoCal Infrared's service to CSUN was excellent and their contribution to the maintenance team commendable. Again, I highly recommend SoCal Infrared and would welcome their contribution to future thermographic projects we work with. Your inquiries are invited.

Sincerely,

Thomas Edvalson

Supervising Electrician
